**Drought - Emergency Irrigation Restriction**

Notice to the Fishers Island Community

Fishers Island is in a moderate drought with a very limited water supply. At the recommendation of the New York Department of Health, we are imposing the following restrictions:

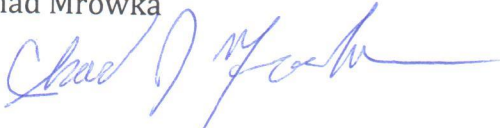

- Irrigation of lawns, gardens and plantings is restricted to one day a week.
- Refilling or topping up swimming pools of any kind is prohibited.
- Please defer other exterior uses of water such as washing cars or house windows.
- Please report any leaks in water supply mains by calling Chad Mrowka at 631 788 7422. Of course, please deal promptly with leaking taps or other plumbing in your houses.

We will issue a notice when these restrictions have been lifted.<sup>1</sup>

Additional information on measures we are taking to improve water supply will follow soon.

We greatly appreciate everyone's concern and cooperation.

Chad Mrowka

Superintendent  
Fishers Island Water Works Corporation
